

OpenCV Introduction to Character Recognition and Machine Learning with KNN

[Click here to go to the YouTube video for this repository](#)

Note: The video begins supposing you have followed the ***OpenCV 2.4.11 Windows Installation Guide***, also available on my GitHub page / YouTube channel. If you have not followed that already please do so before continuing with these programs.

These programs demonstrate basic Character Recognition and Machine Learning using the KNN algorithm in OpenCV. Both a C++ and a Python version are available. Please see the video for further explanation as everything is fully demonstrated.
